Joann

Frustrating still on the procurements. There process has not improved. All they did was add a procurement assistant and hit me with a lot of hours. I would like you guys to get the backup for RCMS and review their process in relation to our type of contract "emergency and Rapid Response Services". I also think I got charges for the to requalify their team sub so they could use them and billed it as Health and Safety prep.

I feel stuck to approve the procurement costs.

Gary
